ACDC Agricultural Chemicals Distribution Control

Ballistic Training Solutions is a proud provider of Conservation and Land Management Training Solutions to the Agricultural, Environmental & Rural Industry Sectors.

Linking our pest management training strategies and our conservation land management and rural operation strategies we are committed to ensure our students receive the best industry training available.

We advocate and demonstrate environmentally sustainable practices in preserving and managing our natural resources for future generations.

We are committed to providing the highest quality training and assessment services for animal welfare and environmental management strategies for the community and actively work with key stakeholders in developing industry best practice and minimum standards to ensure environmental sustainability objectives are met.

ACDC Agricultural Chemicals Distribution Control Course

This course includes the theoretical and practical components of two (2) units of competency chosen by the Department of Primary industries to meet skills and knowledge required to be able to apply to hold an ACDC unrestricted Licence.

This course consists of two (2) units of competency that make up the skill group that includes the skills and knowledge to identify and apply and reporting control weeds methods; hazard and risk management; prepare, apply and safely use chemicals; calibration; SDS use; chemical records; and spray plans; transportation, chemical management and storage.

- **AHCCHM307** Prepare and apply chemicals to control pest, weeds and diseases
- **AHCCHM304** Transport and Store Chemicals

Under the Agricultural Chemicals Distribution Control Act 1966, if you intend to use ground equipment to distribute herbicides on land that you or a close relative do not own or occupy, you may need a commercial operator's licence.

Factors that can determine if you need a licence include the type of ground equipment that you are using and whether you are carrying out the **ground distribution** in a declared **hazardous area**, a regulated area or non-regulated area of the state.

You must be at least 17 years of age to be issued a commercial operator's licence. You do not need a licence if you are carrying out ground distribution outside of the **regulated areas** in Queensland.

Commercial operator's licences are issued by Biosecurity Queensland.

A commercial operator's licence is issued for either a 1-year or 3-year period, nominated by the applicant when they apply.

Further Details

To enrol or enquire on further course details, please contact one of the team at Ballistic to discuss your future training and development by email or by phone: 1300 738 098

Course Cost

\$470 per student
