

AHC51120 Diploma of Conservation and Ecosystem Management

DESCRIPTION

This qualification reflects the skills and knowledge required for skilled and paraprofessional work in conservation and ecosystem management. Workers with this qualification perform in operational managerial and/or technical positions often with specialist skills and knowledge in a range of sectors. Examples of areas of specialisation include:

- Indigenous land management
- ecosystem restoration, rehabilitation and renewal
- conservation works
- parks management and/or administration
- wildlife management
- marine and/or coastal management
- water and catchment management.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

A high level of understanding in Conservation and Ecosystem Management practices and strategies is expected as a foundation in entering this qualification.

OVERVIEW

This course is delivered in a face to face workshop and industry field placement format incorporating knowledge-based theory assessment and field practical assessment activities conducted over a day depending on the knowledge skill and competency of participants.
